Brand new & hot – the pyrography

Old-fashioned woodburning is a thing of the past! We are putting the classic pyrography “behind the stove” – this popular DIY hobby has never been so trendy!

Tradition, deceleration, hygge - you can't get past them at the moment. Working with wood is exactly what this is all about: unlimited cosiness for you and your loved ones. Whether young or old, classically modern or Scandinavian minimalistic – get in touch with nature and experience the real, true work with a natural material that makes your four walls even prettier.

You want to make it comfortable in your home? Then grab the woodburning pen and design old & new wooden decoration elements according to your taste!

Even your loved ones will be happy about these special, haptically & visually interesting gifts. One thing, however, is certain: you won't be the only one “burning” for...

Nothing goes without a good woodburning pen – but with it, anything goes. Simple wooden surfaces are transformed into very personal souvenirs, old wooden elements are redesigned – over and over.

All you have to do is...

Pick up your woodburning pen of Rayher (1) and choose your favourite piece of wood (2) – you're all set! With our transfer paper, you can copy templates of Rayher (3) or your own motifs onto the wooden piece in no time at all, and if desired, you can customize it with some colour (4).

Hello Hygge decor!

The Danish sense of security that has also spread to us and stands especially for the cosiness in your “home sweet home”, reflects precisely the new pyrography. Thus, wood is a beautiful, warm natural material that makes our home really comfortable. With personal motifs or statements, it will become trendy and completely according to your style.

Whether it is about little, subtle pendants, practical wood chip boxes, noble boards or trendy decorative shapes - we have the perfect range of wood articles for your “burnt” design.

It's as simple as that...

You have found your favourite motif and would like to apply it onto your chosen wooden element? By means of our transfer paper, it's quick & easy:

- 1** Place your favourite motif in the desired size on the substrate. To prevent the motif from slipping during transfer, fix it to one side.
- 2** Now slide the black transfer paper, with the black coated side facing down, under the motif paper.
- 3** Then trace over the motif with a pointed object (e.g. ballpoint pen, pencil).
- 4** Done! Now you can burn your motif with the woodburning pen.

Or choose a stamp according to your taste and stamp the motif on your wooden element. Afterwards, you can also burn it quickly and easily.

Through thick and thin

Whether fine lines, thick contours or a small heart - the different nibs of our woodburning pen facilitate your work and offer you even more possibilities. Choose your favourite nib and replace it at any time, depending on the project, by simply screwing it onto the woodburning pen.

Quick results can be achieved with the finished wood-burning stamp motifs such as a small heart or enchanting star. There you have immediately a finished motif which you only have to apply onto your favourite wooden element.

Wood becomes colourful

Sometimes it just has to be pinkish - or light yellow, royal blue or mint green. For this purpose, we offer you fluid, airy glazes that will enhance your piece of wood in no time at all.

Our glazes are transparent, water-based non-opaque paints that have a protective surface sealing property.

Cooking is passion – so is pyrography!

The way to a man's heart is through his stomach – but what if you could get your loved one's attention while you're cooking? Trendy cookware accessories with a message, very personal cutting boards or funny bottle openers – there are no limits to your imagination.

Turn your kitchen into a creative eye-catcher with unique kitchen utensils – and the next kitchen party can take place! After all, wooden spoons and the like are also perfect gifts for guests.

Original & individual!

With our wooden postcards in standard format with address field, you not only send off joy, but also a lot of creativity! For the design, you can choose your favourite motif among our transfer papers with templates and make it even more colourful with our glazes – or grab your wood-burning pen and create your very own motif.

Start the burn, design it, put the address on, send it away and “let the post office do the rest”!

All you need is love...

or I burn for you! In the true sense of the word. The wood burning art now becomes a messenger of love – whether as an affectionate eyecatcher, as a gift from the heart or as a wonderful decoration for your vintage dream wedding. Place cards, goodies & Co. can also be designed in a modern and very personal way with this classic craft technique.

Wanderlust - or the new desire for adventure

We travel and experience foreign cultures. We collect valuable memories and save for the next city trip. Our experiences shape us...

Memorize them now even better and create unique memory boxes, amazing wood chip boxes, creative eye-catchers – simply with our wood-burning pen!

Rayher.

Pendulous? Yes, please!

With our woodburning pen, you can conjure up the matching pendant for any occasion in no time at all. Whether as a gift or decoration pendant or as a little, nice gift from time to time – your creative possibilities are limitless and giving away homemade little odds and ends is so much fun!
