## CANVAS – the trendy textile

Textile design is one of the DIY classics and is right in line with current trends; ultimately, individualism has become an integral part of fashion and interior design industry. Create your very own must-have! After all, what could be more beautiful than gathering compliments for your own textile work of art?

You like to sew and model your own cuttings? If so, grab our canvas cuttings and let your imagination run wild!

With our ready-made basics such as pillowcases, shoppers and the like, you can create cool canvas styles even without sewing machine.

The versatile textile offers you endless possibilities for individual design. Whether young or old – here everyone finds their personal favourite technique: printing, painting, stamping, ironing or dyeing. A creative pastime for the whole family – together, you will make your home and your wardrobe even more attractive!

In combination with textile accessories such as tassels and decorative bobbles – exceptional creations, practical fashion accessories and stylish eye-catchers are created in a flash.

### All you have to do is...

Choose your favourite canvas item (1) and your favourite paint – for example the batik hand-dyed colour - and the creative adventure can start! With stencils and appropriate textile dyes (2), beads and tassels (3) as well as decorative bobbles (4) and a matching pompom edging (5) – your personal artwork can be created!

There is hardly a DIY trend that lasts longer and offers more possibilities than the creative design of textiles. Canvas in particular offers here the best conditions: it is easy to dye, print and sew. You can also set new standards in the trendy grey colour.

## It's getting colourful!

Whether practical as a fabric storage basket or simply as a nice cushion or wall decoration. Printed, painted, pasted or sewn – your canvas highlights will quickly become true eye-catchers in your home making it so nice and cozy!
