

Chalky Finish - the look that everyone wants to have!

The ultra-matt product world Chalky Finish convinces with its elegant appearance and soft feel. With this product, you achieve easily a charming trendy look at your home.

- **Wipe-resistant & water-based chalk paint**
- **Can be easily sanded for an used-look**
- **Very good adhesion to most substrates, good opacity, high colour intensity, non-fading**

Discover its diversity!

You have the choice between applying this ultra-matt paint by means of the brush, spraying with a spray can or emphasizing by a marker. You can naturally combine together all these variants given that all Chalky Finish products are matched to each other in terms of colour.

Find the corresponding product for your project!

With our classic **Chalky Finish** in a paint pot, just dip the brush into the paint and start painting. For uneven surfaces such as a basket, natural materials or fine structures, the soft atomized spraying of the **Chalky Finish spray** is recommended. Delicate writings, decorations and patterns, you can achieve by using **Chalky Finish marker**.

To allow you to achieve a chalky-look even on glass and porcelain, we have provided you with a **Chalky Finish for glass**. Due to the baking in the oven, the paint gets an optimal surface adhesion. Now, it's up to you: create your very own chalky-world!

↑ Art. 34 371 ...

Chalky Finish spray:

- Fast-drying, ultra-matt water-based colour spray
- Non-yellowing, weatherproof

Application:

- The substrate must be clean, dust- and grease-free.
- Before use, shake the can thoroughly. Apply it crosswise in thin layers at a spraying distance of about 25-30cm – allow to dry between layers for about few minutes.
- Turn the spray can upside down and press on the spray valve until is empty.
- There are also a matching primer and a clear varnish in the form of a practical spray can.

Chalky Finish:

- Non-fading, long shelf life thanks to the coloured resin system
- Extremely low VOC content
- Saliva- and perspiration-resistant according to DIN53160-2

Application:

- The substrate must be clean, dust- and grease-free.
- For a direct brush application, we recommend a soft synthetic wide brush.
- For an optimal protection (for e.g. outdoor area), paint over the dried-out paint application with the Chalky Finish cream-wax or clear varnish.
- There are many other suitable media for special effects.

Chalky Finish for glass:

- The ultra-matt chalky paint especially conceived for smooth, non-absorbent surfaces such as a glass and porcelain
- After baking dishwasher safe

Application:

- The substrate must be clean, dust- and grease-free.
- After drying (4 days) bake it in a non-preheated oven at 160°C, let it cool down in the oven.
- The glass objects painted from outside get a distinctive ultra-matt appearance – painted from inside, they keep their gloss, and the colours seem luminously brighter.
- By sanding prior to baking, you get also easily the trendy used-look on glass.

Chalky Finish marker:

- High-quality acrylic ink with a high chalk content
- Valve/pumping system for a rich colour application
- Fast-drying and weather-resistant
- Ink and plastics comply with EN71-3

Application:

- The substrate must be clean, dust- and grease-free.
- Very simple: before drawing, shake it thoroughly with the cap still on, so that the pigments are optimally mixed.
- Then, tap it carefully by a gentle pressure onto the tip.
- To avoid the pen tip to stick, just pull it out carefully after drawing and clean it under running water.
