WE HAVE REDEFINED DREAMCATCHER.

[WWW.RAYHER.COM](http://WWW.RAYHER.COM)

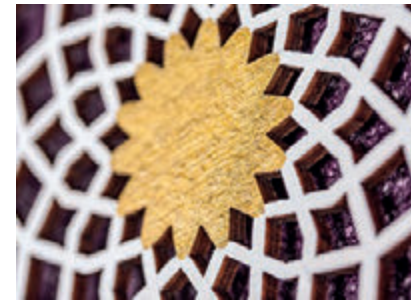

## Individual – creative – simply chic for your home!

Wall decorations simply made by yourself! With laser-cut wooden elements, screen printing stencils and metal rings in various sizes & colours, magical creations can be created for the home. Dreamcatchers are classics. With simple tricks and some refinement, the sought-after decoration favourites get a new trendy look – these wall hangings give your home a contemporary look and invite you to dream!

### All you need to know...

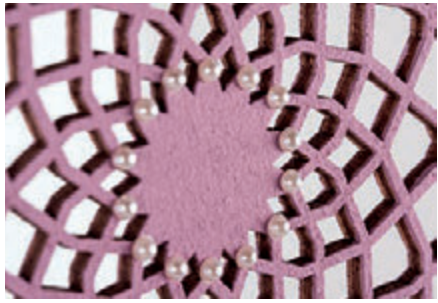

Many lasered wooden discs (1) together result in individual patterns. To achieve this, the discs have to be fixed together by strings (2). Now it's time for decoration! All kinds of cords and ribbons in various colours & lengths are knotted around the discs, and refined with colourful beads (3), feathers (4) and tassels (5).

### Dreamcatcher – as unique as you are

Personally designed dreamcatchers invite you not only to dream! Individual combinations of various elements also give these decorations a unique look.

The playful material & colour compositions give your own four walls a refreshing new look. Creative boundaries? With these DIYs, they can only be pushed forward.

**Filigree unique pieces  
– creatively designed!**

Whether in impressive glamorous gold or with pastel colours being put romantically into spotlight – your wall decoration gets an exceptional appearance by colour, material mix and variety of shapes. The colour is not always necessary. The completely natural filigree discs in Mandala design are also very attractive, and can be hung up or glued on.

### For beautiful dreams

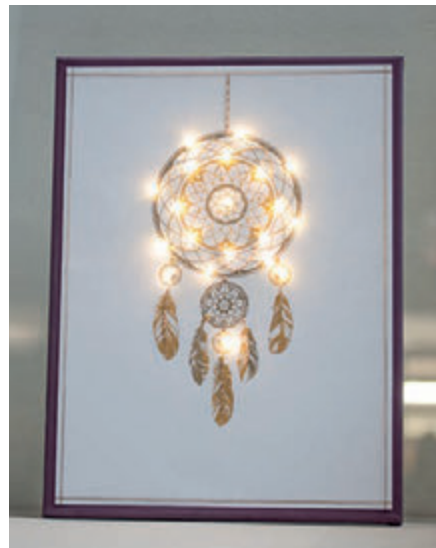

Screen printing stencils with appealing motifs embellish many surfaces such as fabrics, canvas frames and wood. The application of your favourite motifs is quick and straightforward. Give it a shot! The quality convinces!

## Glowing effects for atmospheric evenings

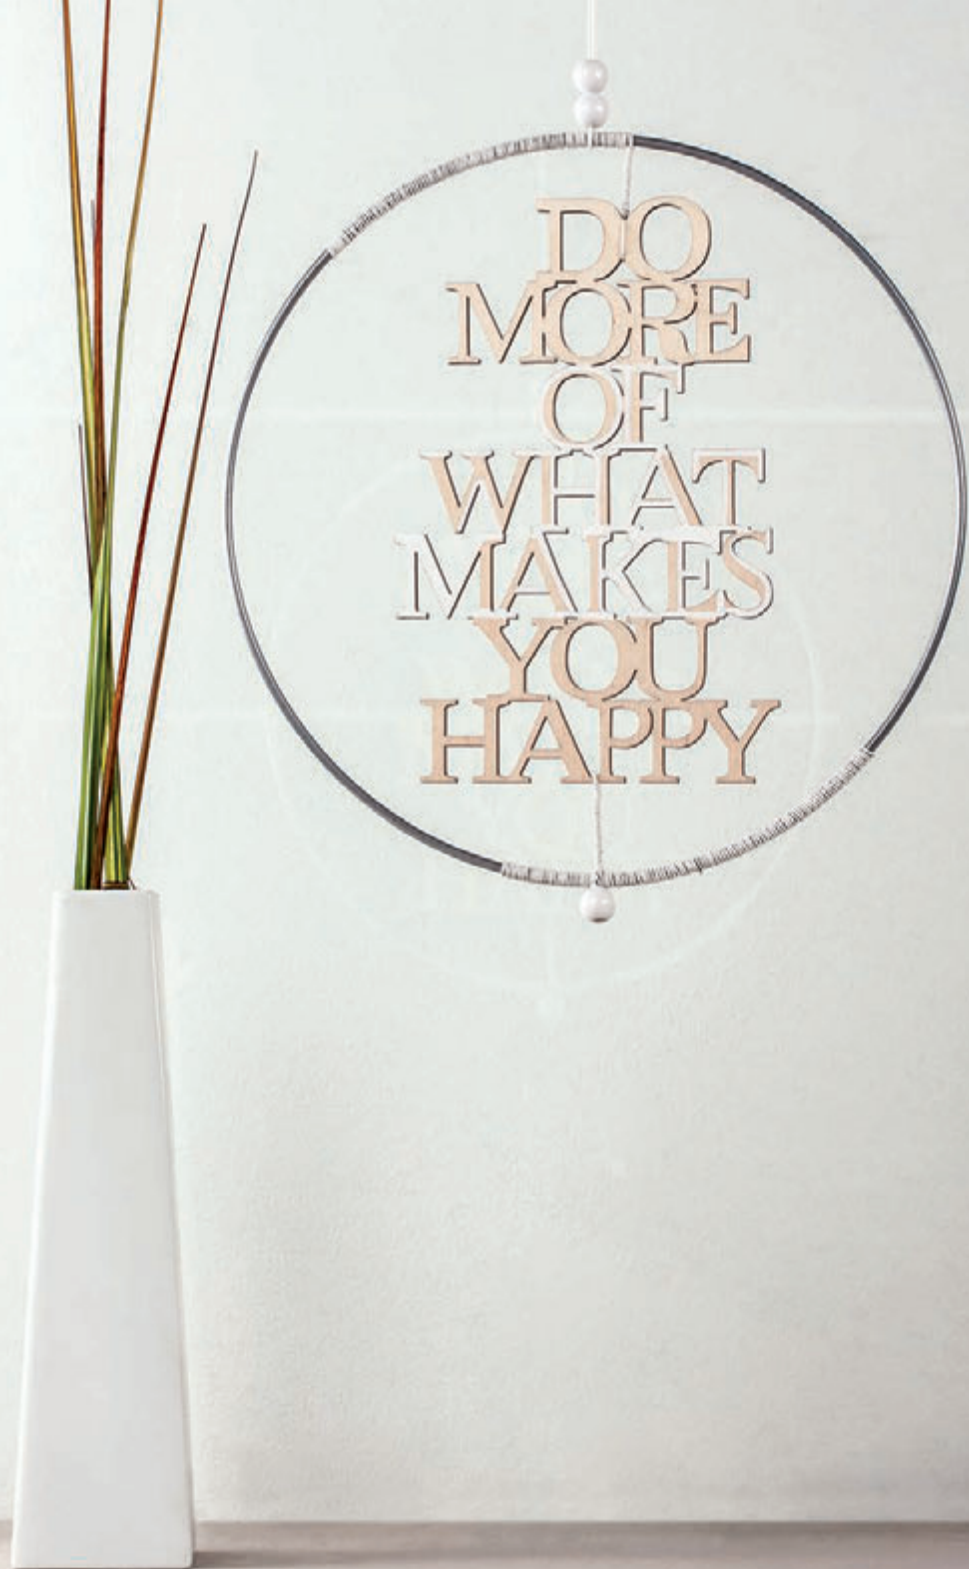

LED fairy lights bring your dreamy decoration the radiance of light. The practical light dispensers can be optimally fixed to wooden discs, metal rings or even to canvas frames in various lengths. That way, your favourite piece is perfectly put in the limelight.

### **Fall in love... with unique interior designs**

Simple metal rings, cords and paper-wrapped wire become an impressive eye-catcher. Floristic elements underline messages which, thanks to your creativity, are skilfully staged. Current trends can also be combined with each other any way you like. Macramé meets dream-catcher? No problem at all!

**One line of reduced and yet so decorative!**

Lasered messages find a very special frame in metal rings that inspires. These all-rounders can be designed to your heart's content.

**With an eye-catching effect**

Totally minimised and fashionable – that's also possible. The metal rings and leatherette cords coalesce into broadly spread trend.

### Oh, you cheerful...

Every Christmas requires atmospheric decorations. From Advent calendar up to room & wall decoration – many small details find their place here. The party of all parties can be started!

**Something green**  
... makes these wreaths perfect.

## Handicraft kits – Start dreaming!

As a nice gift or just for yourself. The practical material sets with detailed instructions offer everything to start up in a creative and uncomplicated way.
