Small cotton bag with dots

Used items:

45 132 000	Paper templates Basic Shapes	1 piece
35 027 282	Fabric spray paint, crimson red	1/10 bottle
35 027 576	Fabric spray paint, black	1/10 bottle
38 465 287	Textile dye Extreme Glitter, classical red	1/20 bottle
38 465 576	Textile dye Extreme Glitter, black	1/20 bottle

Additionally you need:

37 057 000	Paintbrush set for fabric painting, FSC 100%
34 014 00	Adhesive spray, non-permanent

Working mat, masking tape, paper towel, cardboard

Instructions:

- 1 Put the pre-washed (without using fabric softener) and then ironed cotton bag on the working mat. In order to prevent paint bleed-through, insert a cardboard in the size of the bag.
- 2 Spray the rear side of the paper template with the non-permanent spray adhesive. Allow the template to flash off briefly and place it centrally and press on all over evenly. To cover the rest of the bag, stick a piece of paper towel on each of the four sides by means of the masking tape. Thus no unwanted spray mist gets on the bag.
- 3 Shake the paint well and spray it first to test, for example on a piece of paper towel. You can ensure an even paint distribution by spraying and moving simultaneously the arm over the cotton bag (at a distance to the fabric of approx. 20 cm). Spray the upper dots of the template with the crimson red fabric spray paint and the lower dots with the black fabric spray paint. Remove the template immediately and let the paint dry well out.
- 4 After drying, put the template identically back in place and press it slightly on. Then, apply some textile dye Extreme Glitter in classical red and black colour onto just a few dots, as an additional highlight. Remove the template and clean it with a cloth if necessary. The template can be used several times.
