Illuminated wooden frame

## Used items:

<b>62 789 000</b>	Wooden frame with acrylic glass	1 piece
<b>38 867 102</b>	Chalky Finish, white	approx. 10 ml
<b>38 867 574</b>	Chalky Finish, ebony	approx. 3 ml
<b>60 589 576</b>	Sticker alphabet + numerals	
<b>60 590 576</b>	Sticker alphabet + numerals	
<b>58 883 271</b>	Scrapbooking-paper Double Dot	1 piece
<b>79 294 576</b>	Linen structure paper	1 piece
<b>69 137 000</b>	Micro LED-fairy lights with wire	1 piece
<b>36 038 000</b>	Casting mould: medium-sized Star	1 piece
<b>36 990 000</b>	Casting powder "Raysin 200"	180 grams
<b>38 887 000</b>	Stencil DIN A5: Basic Motif	1 piece
<b>81 283 06</b>	Mirror foil, gold	some
<b>33 384 00</b>	Glue for foil	some
<b>85 472 000</b>	Feather of a pheasant	1 piece

## Additionally you need:

<b>27 285 00</b>	Hobby knife
<b>89 234 00</b>	Cutting mat
<b>89 288 00</b>	Ruler out of aluminium
<b>37 106 00</b>	Flat brush
<b>33 376 00</b>	Mini hot glue gun
<b>38 032 00</b>	Metallic spatula
<b>30 071 000</b>	Double-sided adhesive tape, extra strong

Plain cardboard, scissors, batteries

## Instructions:

- 1 For the preparation, cast the Raysin Star about 7mm thick according to the package instructions.
- 2 You can remove the star carefully from the mould after about 2 hours. Thereafter, let it dry over the night.
- 3 Apply the glue for foil and then the mirror foil onto the stencil Star.
- 4 Prime the outside of the frame with Chalky Finish (white). Let it dry well. For a sturdy backing, cut the scrapbooking paper out and the cardboard in the size of the frame.
- 5 Affix the scrapbooking paper onto the cardboard with the double-sided adhesive tape.
- 6 As a gap between the back panel and the star, use the remaining paper. For this purpose, roll up together about five small paper tubes about 3.5cm in height.
- 7 Draw the star with a pencil, slightly centred, on the stuck together paper.
- 8 Glue the small tubes evenly distributed on the painted star by means of the mini hot glue gun.
- 9 Drill a hole centrally through the paper by using the tip of the scissors, so that you can put the battery case outside.
- 10 Pull the starting end of the fairy lights from behind and dispense the lights loosely within the star. Affix the fairy lights, here and there, with some adhesive tape.
- 11 Affix firmly the battery case at the back panel with the adhesive tape. Glue the star onto the paper tubes and the feather onto the star by means of the hot glue gun.
- 12 Close the frame with the double-sided adhesive tape.
- 13 At the end, put the viewing window as required with the stickers.
