Bunny out of concrete

WWW.RAYHER.COM

Used items:

36 089 000	Casting mould: bunny	1 piece
34 152 000	Creative-cement	600 g
38 867 102	Chalky Finish, white	1/30 bottle
33 384 00	Glue for foil	5 g
81 283 06	Mirror foil, gold	2 × 3 cm

Additionally you need:

61 217 31	Craft sticks
89 530 00	Sandpaper
37 075 000	Set of brushes
	Cooking oil
	Plastic container
	Kitchen roll
	Scales

Instructions:

1 Grease the mould.

Fill the plastic container with about 60 g of water and then gradually add 600 g of the creative-cement. Stir the mixture until an uniform and castable compound is obtained.

2 Pour the mixture slowly into the prepared mould. Make sure you don't pour up to the top of the mould!

Tap slightly against the mould several times with your fingers, so that potential air bubbles can escape upwards.

Let it dry out overnight.

The next day, you can remove the bunny from the mould by turning the casting mould over and by pressing slightly several times with the palm of your hand against the casting mould until the bunny becomes entirely detached from the mould. If necessary, tap slightly the casting mould onto a soft surface.

3 Allow the demoulded bunny to harden well. At best for several days.

For the designing, take some white Chalky Finish paint and paint the upper part of the ears. Let it dry well out.

Afterwards, design the bunny with the glue for foil and the mirror foil according to the package instructions.

* Without drying time
