Star out of concrete 21.5  
with metallic strips

## Used items:

<b>36 038 000</b>	Casting mould „Star“, medium-sized	1 pc
<b>34 153 000</b>	Creative-cement	approx. 1900 g
<b>38 610 576</b>	DecoArt Patio paint, black	1 bottle
<b>33 952 01</b>	Crepla sheet	1 x 20 cm
<b>33 390 00</b>	Special double-sided adhesive tape	some
<b>21 700 24</b>	Deco-metal, copper	some
<b>21 730 00</b>	Leaf adhesive	some
<b>21 733 00</b>	Protective varnish	some

## Additionally you need:

<b>89 476 00</b>	Sandpaper
<b>37 103 00</b>	Brush

Cooking oil, support out of Crepla or cardboard, scissors, ruler

## Instructions:

**1** Cut a strip 1 x 20 cm long out of the Crepla sheet and affix it inside of the casting mould by the means of the adhesive tape. Finally, coat thoroughly all of the inner surfaces of the casting mould (the Crepla strips as well) with the cooking oil.

**2** Pour about 190 ml of water in a plastic bucket and then gradually add approx. 1900 g of the creative-cement powder. Stir this mixture with a craft wooden stick until an uniform and castable mass is obtained.

**3** Fill the prepared star-shaped casting mould with the casting compound until you reach the desired height. Let the mixture rest for about 1-2 minutes. Thereby tap repeatedly and slightly onto the mould to release any air bubbles from the cement mixture.

**4** Let it dry out overnight.

**5** Now, you can demould carefully the cured object by turning the star-shaped casting mould around and laying it on a support out of Crepla or cardboard. Then carefully press slightly with the palm of your hand on the

back of the casting mould, so that the air penetrates between the casting object and mould. Tap the star-shaped casting mould carefully & slowly in circles on your support, so that the star out of concrete becomes entirely detached from the mould.

**6** Allow it to harden. The curing time varies depending on the size and the temperature (at best, one to several days).

**7** Small burrs and irregularities can be quickly & easily grinded with sandpaper.

**8** For a particularly shiny effect, spread the strip soaked in the leaf adhesive, let it dry and then put the deco-metal on. Press it down with a soft brush, then polish it gently with a soft cloth and wipe excess residue off. At the end, if desired, coat it with the protective varnish.
