# Lemon-shaped soap

### Used items:

<b>34 235 000</b>	Soap casting mould: oval motif	1 piece
<b>34 228 000</b>	Creative-soap, opaque	about 20 g
<b>34 226 000</b>	Creative-soap, transparent	about 50 g
<b>34 246 160</b>	Soap colour, lemon	about 4 drops
<b>34 254 000</b>	Soap fragrance oil, lime	about 2 drops

### Additionally you need:

Stove, melt, melting pot, scale, small plastic container, stirring sticks or teaspoon, tablespoon

### Instructions:

**1** Melt about 50g of the transparent creative-soap in a water-bath on the stove (max. 60° - do not boil).

**2** After a complete melting, stir 4 drops of the soap colour lemon and 2 drops of the fragrance oil lime into the liquid soap. Therefore, use a plastic container, a wooden spatula or a teaspoon.

**3** Now cast the soap in the casting mould and let the soap cool down somehow until a sort of curd forms on the surface.

**4** Melt about 20g of the opaque soap and pour it over the barely dried soap on which after about 10 minutes a sort of curd has been formed on a surface.

**5** Let the soap dry well out (at least 2-3 hours, ideally one day). Demould the soap by a slight pressure.

**Tip** Let the finished soap dry at best for 2-3 weeks; the longer it ripens, the firmer becomes.

**6** Depending on the temperature and airiness, the soap can perspire. We therefore recommend to wrap the soap after its demoulding in a transparent foil for flowers (cellophane).

**7** Clean the soap casting mould and the pots with hot water.
