Decorative illuminated bottle
“Let it snow”

Used items:

46 345 000	Glass bottle with cork lid, 10 cm ø	1 piece
66061000	Decorative fir tree, snow-covered	1 piece
39 601 00	Decorative snowflakes	approx. 1/40
85 143 02	Decorative feather, white	1/15 piece
46 443 617	Wooden shapes Deers, glimmered	3 pieces
69 144 000	Micro LED string of lights with wire	1 piece
55 704 616	Glitter ribbon, gold	80 cm
50 105 000	Decorative peel-off motifs „let it snow“	1 sheet
33 381 00	3D glue	1/50 tube
61 098 00	Wooden skewer, 3 mm ø	1 piece

Additionally you need:

89 229 00	Tweezers, 13 cm	1 piece
38 241 00	Painting sponge	1 piece
33 363 00	Mini hot melt glue gun	

bowl
cold water
Cosmetic tissue
1x cell battery CR2032

Instructions:

- 1 Clean the glass bottle with detergent and water. By means of the wet painting sponge and a drop of detergent make a foam concentrate. With this foam, the decorative peel-off motif can be applied more easily. Follow the instructions for the decorative peel-off motifs and apply accordingly the motifs to the glass bottle. Use the wooden skewer to apply a small amount of the 3D glue to the base of the fir tree.
- 2 Then, glue the decorative fir tree and the 3 wooden shapes Deers with the 3-D glue into the glass bottle. To do this, use the tweezers and the wooden skewer. Put also a small blot splash on the feet of the deer and stick it into the glass bottle by means of the tweezers. The glue dries slowly, so do not tip the bottle over as much during further decoration. The glue dries slowly, therefore do not tilt the bottle too much during further decoration.

- 3 Sprinkle in the decorative snowflakes and put a few decorative feathers on top.
- 4 Insert the cell battery into the micro LED string of lights and glue it with the hot melt glue onto the lower middle of the cork lid. Wind the coated wire around the battery compartment and affix it with the hot melt glue. Coil the string of lights loosely into a spiral and then put it around the fir tree preferably spiral-shaped.
- 5 Wind twice the gold glitter ribbon around the neck of the bottle and tie it laterally with a loop on one side. Stick a few decorative feathers to the ribbon hanging down by means of the hot melt glue and make a knot at each end.
