Faceted glass vase

WWW.RAYHER.COM

Used items:

56 929 000	Glass vase faceted, 10 × 18 cm	1 piece
38 866 560	Chalky Finish for glass, light-grey	1/10 bottle
38 866 266	Chalky Finish for glass, salmon pink	1/20 bottle
38 434 00	Sponge stamp	1 piece

Additionally you need:

Masking tape

Instructions:

- 1 Before the creative designing, clean the glass vase grease and dust-free with water and detergent.
- 2 Stick on the masking tape approximately in the middle of the vase along the edges of the geometric surfaces and dab off uniformly the light-grey Chalky Finish at the lower part of the vase with the sponge stamp. Take off the masking tape and let the colour dry thoroughly.
- 3 Now stick on the edges of the geometric forms at the upper part which are gonna be afterwards painted. You can achieve great effects if you leave always between the two painted surfaces, an area free and unpainted.
- 4 Dab off the desired glass surfaces with the salmon pink Chalky Finish. At the place where two glass surfaces remain adjacent unpainted, will be instead dabbed off an additional painted section at the lower area of the vase.
- 5 Let it dry.
- 6 After four days drying time, the paint on the glass vase is so hardened that you can fix it in the oven according to the instructions of the label and that way, you can wash it in a dishwasher.
