

CRAFTING IDEA

Soft and handy.  
Felted key ring.

[WWW.RAYHER.COM](http://WWW.RAYHER.COM)

## Used items:

- 53 649 00** Merino roving tuft, super smooth, black/white/grey shades
- 22 288 21** Key ring with swivel joint, 35 mm ø
- 14 682 608** Glass bead with big hole, transparent, metallic, 9 mm ø
- 53 640 00** Mega felting fluid
- 53 564 558** Cotton yarn "Stich & Knot"
- 22 247 21** Split ring, 9 mm ø

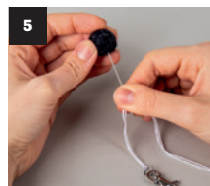

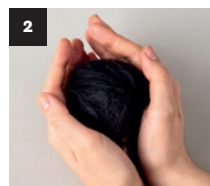

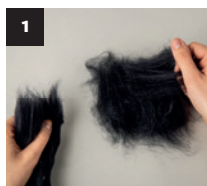

## Additionally you need:

- 53 641 00** Mixing bottle
- Needle with large eye

## Instruction:

- 1** Mix the Mega felting fluid in the mixing bottle according to the instructions. Pick fine strands from the layered wool roving, which are then laid on top of each in a crosswise sequence.
- 2** Take the superimposed surface in your hand and roll it up in the palms of your hands without pressure until you get a loose fluffy ball.
- 3** Moisten the ball in the palm of your hand with the liquid from the mixing bottle. Then roll it up without pressure until you get a nicely shaped ball. Now slowly increase the pressure when rolling so that the fibres become denser.
- 4** If the felting wool is still too dry, drizzle a small amount of liquid over the ball. Increase the pressure until you obtain a nice round and firm ball.
- 5** Now thread the dry felt balls by means of a needle. Start by attaching the thread to the split ring, continue by stringing the felt balls and beads to your liking and finish by tying a knot.
- 6** Finally, link the snap hook to the split ring.

**TIP:** You can also create your key ring in different colours of Merino wool roving (e.g. item no.53 651 00 or 53 652 00) and use raw-wood balls (e.g. item no.74 991 000) instead of glass beads.
