Glass jar with tassels

Used items:

46 344 000	Glass bottle with cork lid, 8 cm ø	1 piece
55 517 390	Yarn, 1 mm ø, lagoon	21.20 m
55 517 414	Yarn, 1 mm ø, lime green	15.80 m
55 517 258	Yarn, 1 mm ø, pinkish	15.80 m
14 068 49	Rocailles, 2,6 mm ø, not washable	6 g
89 168 37	Magic-Stretch, crystal	40 cm
89 300 100	Threading yarn for Delica-Rocailles, 0.27 mm ø, snow-white	
21 548 00	Special needle to thread Delica-Rocailles beads	
89 378 00	Craft scissors	
33 383 00	Multi-purpose adhesive	

Instructions:

Line the lagoon, lime green and pinkish yarn up, cut them to the size of 1 x 60 cm and knot their ends together, then cut them to the size of 2 x 2 m and secure their ends with knots as well.

- 1 Lay the 60 cm long yarn in the middle, then underlay centrally the 2 m long rug yarn on one side and tie a weaver knot (see picture).
- 2 Create another weaver knot with the other 2 m long rug yarn, cross the rug yarns lying in the middle and tie one more weaver knot on both sides.
- 3 Repeat this step continuously until a length of about 18 cm in knots is reached.
- 4 With the 30 cm long yarn make a winding knot at all ends, for this form a loop, wrap in the direction of the loop, pull the end through. Pull the short end of the loop through.
- 5 Cut the ends and the remnants off.

6 Put it around the bottleneck, overlap it and affix it with the multi-purpose adhesive.

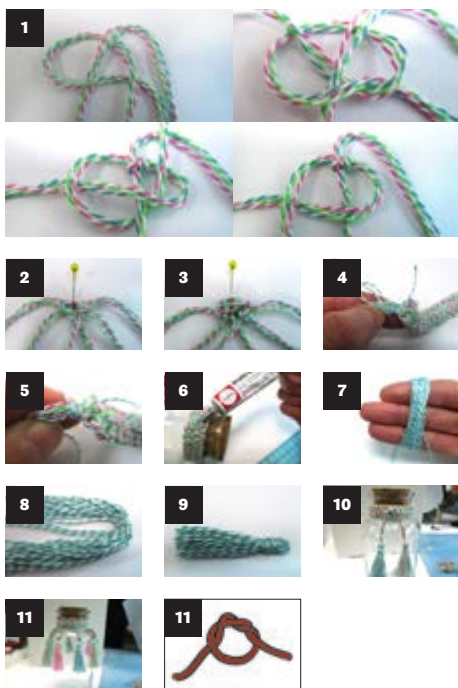

7 Make the tassels (2 x pinkish, 2 x lime green, 3 x lagoon and 3 x tricolour) as follows:
Wrap unicoloured tassels 21 times around 3 fingers – approx. 3 m.
Wrap tricoloured tassels 7 times around 3 fingers – approx. 1.20 m.

8 Knot the bundle together with the 20 cm long yarn. Cut the windings open.

9 Make a winding knot with the 30 cm long yarn (see above).

10 Thread the needle for beads with the threading yarn, sew the knotted strip on. Thread 11 Rocailles beads, sew a tassel on and thread back through the Rocailles beads. Sew the other tassels on at a distance of about 1.5 cm.

11 At the end, thread Rocailles beads onto the 40 cm long Magic-Stretch until the length fits the bottleneck, close it with a safety knot and cut the remnants off.
