Additionally you need:

61 217 31	Craft sticks, 110 × 11 mm, natural
89 342 00	Side cutter for jewellery
	Plastic container
	Paper funnel

Used items:

- 1** The bath salt can be intensively dyed in any manner. For a pale variation, drip 1-3 drops and for the intensive variation 5-6 drops into the white bath salt (corresponding to an amount of about 50g of bath salt).
- 2** To stir the soap colour and the fragrance oil use at best a small plastic vessel and craft stick as a stirrer. Another possibility to add the soap colour and the fragrance oil to the bath salt is to shake it. Therefore, you need a plastic vessel with cap.
- 3** Whether single-coloured, alternately coated with colour layers (as with the small bottle no.3) or light/dark colour gradient – no limits are set to your imagination!
- 4** By using a paper funnel, you can fill easily the glass vessel with bath salt.
- 5** You can achieve a very special custom look through hanging flowers or hearts out of floral wire that you can bend by hand and fasten further at the vessel.
- 6** The label on the small bottle no.2 has to be stamped & punched out and affixed with a double-sided adhesive tape. At the end, tie it with a cord around the glass bottle.
