Frame out of wooden slats
with Mandala

WWW.RAYHER.COM

Used items:

62 616 000	Frame out of wooden slats, FSC Mix Credit	1 piece
34 372 000	Chalky Finish primer	1/8 can
34 371 102	Chalky Finish Spray, white	1/5 can
34 371 572	Chalky Finish Spray, anthracite	1/10 can
34 371 558	Chalky Finish Spray, stone-grey	1/10 can
34 371 312	Chalky Finish Spray, lavender	1/10 can
38 969 000	Stencil Mandala	1 piece
34 014 000	Spray adhesive, non-permanent	1/15 can

Additionally you need:

Cardboard as a spray box, masking tape, paper for covering

Instructions:

- 1 Start by preparing the spraying process by shaking all of 5 cans. After shaking each of them about 3 minutes, the mixing balls should be clearly audible.
- 2 At first, prime the frame out of wooden slats with the primer Chalky Finish spray. Let it dry well out.
- 3 Now spray the two lower slats with the Chalky Finish spray anthracite and then the two upper slats with the Chalky Finish spray lavender.
- 4 After a short period of drying (about 10 minutes), spray the central part of the board (three slats) with the stone-grey paint, so that you achieve a nice colour gradient. At a distance of about 30cm, spray at best horizontally at the frame out of wooden slats being inside of an old cardboard box. Let it dry well out.
- 5 After use, turn the can upside down and spray valve spray empty.
- 6 Spray the Spray adhesive non-permanent onto the rear side of the stencil Mandala and let it aerate for a while.
- 7 Place the stencil at one corner of the frame, so that the motif somehow overlaps.
- 8 Coat the rest of the board with the masking tape and paper.
- 9 Shake again the spray can in white.
- 10 Spray the Mandala motif with the white paint.
- 11 Take the stencil and the paper off and let it dry.
- 12 Repeat the procedure at the opposite corner of the frame.
