Wooden soap dish
with red & green soap

Used items:

62 781 000	Wooden soap dish, FSC Mix Credit	1 piece
34 369 000	Soap casting mould: Christmas	1 piece
34 228 000	Creative soap	86 g
34 246 426	Soap-colour, evergreen	2 drops
34 246 287	Soap-colour, classical red	2 drops
34 336 000	Labels "100% Christmas"+moose	1 piece
34 334 000	Labels Snowflakes + Star, 30mm ø	1 piece

Additionally you need:

Stove, pot, melting pot, scales, small plastic container, craft stick as a stirrer, spoon

Instructions:

- 1 Melt the creative-soap in a water-bath on the stove (max. 60° - do not boil).
- 2 After the complete melting, you can stir the desired colour in the liquid soap. Therefore, use a wooden spatula or a teaspoon.
- 3 For the soaps with motif or logo, place upwards the label with the stamping in the cleaned casting mould.
- 4 To avoid blistering or slipping of the label, use at best a tablespoon with which you fill the casting mould with the liquid soap.
- 5 Let the soap dry well out (at least 2-3 hours, ideally one day).
- 6 Demould the soap by a slight pressure.

Additional info

The soap dries or rather carries on ripening and becomes thereby firmer (two up to three weeks). Depending on the temperature and airiness, the soap can perspire. We recommend therefore to wrap the soap after its demoulding in a cellophane foil. Clean the soap casting mould and the pots with hot water.
