Cosmetic bag with glimmering apple

Used items:

53 982 102	Cosmetic bag with zipper, white	1 piece
35 027 267	Fabric spray paint, hot pink	1/5 bottle
35 027 282	Fabric spray paint, crimson red	1/4 bottle
45 131 000	Paper template Fruits/Diamond	1 piece
38 465 576	Textile dye Extreme Glitter, black	1/15 bottle
38 465 617	Textile dye Extreme Glitter, cashmere gold	1/50 bottle

Additionally you need:

37 057 000 Paintbrush set for fabric painting, FSC 100%

34 014 000 Adhesive spray, non-permanent

Working mat, paper towel, cardboard

Instructions:

1 Put the pre-washed (without using fabric softener) and then ironed cosmetic bag on the working mat. In order to prevent paint bleed-through, put some paper towel into the cosmetic bag.

2 Shake the paint well and spray it first to test, for example on a piece of paper towel. You can ensure an even paint distribution by spraying and moving simultaneously the arm over the cosmetic bag. In this case, the colour gradient is horizontal. That means spray on one third from above with the hot pink fabric spray paint, and two thirds horizontally with the crimson red fabric spray paint. If fine spraying is applied at the transition point between the two colours, a soft colour gradient is reached.

3 Turn the cosmetic bag over and repeat this step on its rear side. Also spray the zipper and the handle. Allow to dry well out and remove the paper towel that is inside.

4 Put a small piece of cardboard in your cosmetic bag as a release liner. Spray the rear side of the paper template with the non-permanent spray adhesive. Allow the template to flash off briefly and place it centrally and press on all over evenly.

5 Apply richly the black and the cashmere gold textile dye Extreme Glitter within the template by means of the paintbrush. Then remove the template and clean it with a cloth. The template can be used several times.
