

The Rayher logo is a white circle with the brand name 'Rayher.' in a black, cursive-style font. Below the name, the words 'JUST CREATE' are written in a smaller, black, sans-serif font, following the curve of the bottom of the circle.

Rayher.

JUST CREATE

The image shows two handcrafted birdhouses hanging from a string against a light-colored wooden background. The birdhouses are made of wood and have a pentagonal shape with a circular entrance hole. One is painted red and has the number '2' in red, the other is painted light blue and has the number '7' in blue. Both have a yellow mesh feeder hanging from their entrance holes. A pine branch is visible at the top left.

Used items:

62 913 505	Plywood board with garden decoration template ¹ set	
35 023 390	Glaze varnish, lagoon	1/20 bottle
38 867 389	Chalky Finish, cerulean	1/50 can
	or	
35 023 212	Glaze varnish, coral	1/20 bottle
38 867 222	Chalky Finish, rust	1/50 can
38 363 00	Stencil typeface 2, 30 × 30 cm	1 piece
89 476 00	Sandpaper set, assorted	1/3 sheet
24 031 00	Plug-in wire, annealed, 30 cm, 0.8 mm	4 cm + 26 cm

Additionally you need:

69 218 000	Fretsaw set incl. gimlet hand drill
38 241 00	Painting sponge
37 130 00	Fan brush, pure white bristle, # 4, short handle
37 304 00	Stencilling brush
89 341 00	Flat nose pliers for jewellery

wide sellotape, pencil, ruler

Instructions:

- 1 Transfer the template sheet "Meisenhaus" ("Titmouse birdhouse") with a pencil, ruler and transfer paper onto the plywood board. Screw the fretsaw board with a clamp onto the working table according to the instructions and clamp the scroll fretsaw blade into the fretsaw. Saw the titmouse birdhouse out of the plywood board along the recorded lines.
- 2 For the circle, in order to be able to hang up a titmouse fat ball later, pre-drill a hole with the gimlet hand drill, through which you clamp the scroll fretsaw blade again. Then saw out the circle along the recorded line.
- 3 Unclamp the scroll fretsaw blade and drill out the two spots for the wire by means of the gimlet hand drill. Sand the sawn titmouse birdhouse and the circle smoothly with sandpaper.
- 4 Now apply the glaze varnish in the desired colour on both sides with the painting sponge. Then let it dry well out.
- 5 Then use the fan paintbrush to apply the strong, matching Chalky Finish colour shade (with little paint on the paintbrush). Always wipe in the same direction. Let it dry well out.
- 6 Glue the chosen number, taken from the stencil typeface 2, onto the plywood board by means of the sellotape and apply the Chalky Finish paint with the stencilling brush.
- 7 Use the flat nose pliers to cut off about 4 cm of the plug-in wire, bend a hook and put it in the pre-drilled hole to fasten the titmouse fat ball. With the remaining wire, bend the suspension for the branch on the tree that you hook then onto the other pre-drilled hole.
