Marble Paint Marbled eggs

Used items:

- 39 055 00** Plastic eggs, 6 cm
- 38 861 356** Marble paint light blue
- 38 861 161** Marble paint yellow
- 38 861 210** Marble paint orange
- 38 861 416** Marble paint light green
- 62 039 00** Wooden spits, 10 cm

Instructions:

1 Drop Fill cold water in the bucket. The object you desire to marble should be covered by water. Put the object on a wooden spit. Shake well the colours (ca. 30 sec.) and drop it in the water near the surface.

2 Make some designs Pull a wooden spit through the marble paint immediately after dropping in the colour.

3 Dipping Pull the object slowly into the water, let it in for a few seconds and pull it out quickly. Before pulling out the object, blow over the water, so that the colour flows to the sides of the bucket. Let it dry standing on the spit. After 15-30 minutes the colour is touch-dry.

4 Ready Remove rests of the colour on the water quickly with a sheet of paper (with the edge of the paper). For the next marbling the water has to be free of any colour! If the water is hardly dirty, take new water.
