# Marbled candles

[WWW.RAYHER.COM](http://WWW.RAYHER.COM)

### Used items:

- 31 403 96** Pillar candle, 6 cm ø, cream
- 31 192 96** Pillar candle, 6 cm ø, cream
- 31 407 96** Pillar candle, 8 cm ø, cream
- 31 405 96** Pillar candle, 7 cm ø, cream
- 31 402 00** Pillar candle
- 38 861 102** Marble Paint, white
- 38 861 576** Marble Paint, black
- 38 861 606** Marble Paint, silver

### Additionally you need:

- 62 039 00** Wooden skewers
- Plastic bucket
- Copy paper
- Disposable gloves

### Instructions:

- 1** Choose a plastic bucket that is enough large/deep to dip the candle completely into it. Then, fill the plastic bucket with cold water. Thereafter, shake well the paints, especially the silver one, since this colour-shade contains metal particles. Drip the three colours successively as near to the water surface. Then immediately draw the marble pattern with a wooden skewer.
- 2** Immerse slowly the candle, retain it that way for a while and before taking it out, puff a bit onto the water surface so that the paint flows to the edge. Let the candle dry out for about 30 min.
- 3** Remove the paint residues with a sheet of paper (with the edge of the paper). The water must be clean for a further marbling. If heavily soiled, use fresh water.
