# Marbled soap „Made by me“

## Used items:

<b>34 228 000</b>	Creative-soap, opaque	about 20 g
<b>34 233 000</b>	Soap casting mould: rectangle	1 piece
<b>34 246 374</b>	Soap colour, azure-blue	about 4 drops
<b>34 249 000</b>	Soap fragrance oil, ocean	about 1 drop
<b>34 273 000</b>	Labels GB: "made by me"	1 piece

## Additionally you need:

Stove, pot, melting pot, scale, small plastic container, craft stick as a stirrer or teaspoon, tablespoon

## Instructions:

**1** Melt the creative-soap in a water-bath on the stove (max. 60° - do not boil).

**2** For the soaps with motif or logo, place upwards the label with the stamping.

**3** After a complete melting, stir in the plastic container into the liquid soap 2-4 drops of the azure-blue soap colour and 1 drop of the fragrance oil ocean.

**4** Now, add two more drops of the soap colour into the vessel and stir the colour quite roughly in the soap.

**5** To stir the colour and the fragrance oil, use a craft stick or a teaspoon. To get the soap over the label, use a tablespoon or pour it carefully out of the plastic container into the mould. Thus, the marble look can be spread better.

**6** Let the soap dry well out (at least 2-3 hours, ideally one day). Demould the soap by a slight pressure.

**7** Remove the label at best with a pointed object e.g. a needle.

**Tip** Let the finished soap dry at best for 2-3 weeks; the longer it ripens, the firmer becomes.

**8** Depending on the temperature and airiness, the soap can perspire. We therefore recommend to wrap the soap after its demoulding in a transparent foil for flowers (cellophane).

**9** Clean the soap casting mould and the pots with hot water.
