Used items:

34 228 000	Creative-soap, opaque, 200 g	1 piece
34 234 000	Soap casting mould: Hearts	1 piece
68 044 000	Tags white - Scallop, FSC 100%, 5.7 cm ø	1 piece
29 022 000	Stamp "Handmade with love", 3 cm ø	1 piece
67 210 000	Papier mâché box Heart, FSC Recycled 100%	1 piece
34 246 264	Soap colour, pink	1/20 bottle
68 053 616	Cord, 2 mm ø, gold	1 m

Additionally you need:

Stove, heat-resistant vessel for the water bath, saucepan, small plastic container, wooden spatula or spoon for mixing the paint, cellophane film or cling foil, spoon, stamp pad and tissue paper

Instruction:

1 Melt the soap in a heat-resistant vessel intended for water bath on the stove (at max. 60°C - do not boil).

CAUTION: Never place the melting pot with soap directly on an open flame or a hot stovetop! Risk of fire! Do not expose the melted soap to a temperature above 60°C for a long time.

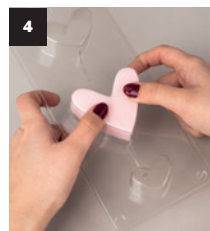

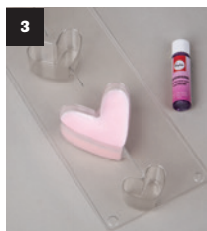

2 After melting, add dropwise the soap colour and the soap-scented oil. Use a wooden spatula or spoon for stirring.

3 Then slowly pour the liquid soap into the mould.

4 Then allow the soap to dry out in the casting mould for at least 2-3 hours. When the soap has hardened, demould it carefully. Let the finished soap to dry well out (for 3-4 days).

5 Lay the dry soap in the tissue paper-lined papier-mâché box and put the lid on.

6 Then stamp the tag with the "Handmade" stamp and string it into the cord. Then wrap the cord twice around the box and tie a bow.

TIP: As the soap dries (for up to 2-3 weeks), it hardens and thus gets firmer. Depending on the temperature and air moisture, a slimy surface may appear on the soap - this is so-called soap "sweating". We therefore recommend wrapping the soap in cellophane film or cling foil after demoulding.

* without drying time
