Bunny out of Raysin

WWW.RAYHER.COM

Used items:

36 089 000	Casting mould: bunny	1 piece
36 990 00	Casting powder „Raysin“ 200	500 g
33 384 00	Glue for foil	3 g
81 283 06	Mirror foil, gold	10 × 10 cm

Additionally you need:

61 217 31	Craft sticks
89 530 00	Sandpaper
37 075 000	Set of brushes
	Plastic container
	Kitchen roll
	Scales

Instructions:

1 Fill the plastic container with about 143 g of water and then gradually & slowly add about 500 g of the Raysin. Stir the mixture with a craft stick until an uniform and castable compound is obtained. Pour the mixture into the mould and let it dry out best overnight.

2 The next day, you can remove the bunny from the mould by turning the casting mould over and by pressing slightly several times with the palm of your hand against the casting mould until the bunny becomes entirely detached from the mould. Allow the demoulded bunny to harden well. At best for 1-2 days. Small burrs and irregularities can be sanded with some sandpaper.

3 Design the bunny as you wish with the glue for foil and the mirror foil according to the package instructions.

* Without drying time
