

**CRAFTING IDEA**

GB

As a small gift or as interior decoration? Candle holders made of Raysin or concrete.

## Used items:

- 36 124 000** Silicone casting mould Candle holder 1 piece  
**36 990 00** Casting powder „Raysin 200“ approx. 200 g

## Additionally you need:

Kitchen scales, plastic container, candle, craft wooden sticks to stir

## Instructions:

- 1 Stir about 200 g of "Raysin 200" according to the package instructions and mix the casting compound evenly.
- 2 Pour the mixture into the silicone casting mould Candle Holder. Do not fill the mould to the very rim so that you can later demould it more easily. Then tap lightly on the mould to get rid of any air bubbles.
- 3 After about 1 hour, you can demould the cast candle holder. Let the candle holder dry thoroughly out for several days.
- 4 After drying, you could add a few highlights, using e.g. a Clear stamp or the all-purpose paint. You can also cast your candle holder with creative-cement (e.g. creative-cement 5-in-1).

\*Without drying time
