By simply rubbing.
Little fir trees in Raysin.

WWW.RAYHER.COM

Used items:

46 831 000	Transfer „Rub on“ X-Mas	1 sheet
36 191 000	Silicone mould Fir trees	1 piece
36 990 00	Casting powder „Raysin“ 200	150 g
44 009 502	Macramé yarn, assorted	0.35 m

Additionally you need:

Scissors, tweezers, double-sided adhesive tape, mixing vessel, poss. sandpaper

Instructions:

- 1 Mix about 150g of Raysin following the instructions on the package and cast a small and a large fir tree using the silicone casting mould Fir trees.
- 2 After about an hour's drying time, carefully demould the fir trees. It would be optimal if the fir trees could dry out for another day or two. If necessary, you can sand their edges using sandpaper.
- 3 Cut out the motifs from the transfer foil „Rub on“ X-Mas using scissors.
- 4 Then transfer these very same motifs, one after the other, on the fir trees. Next, remove the carrier foil from the motif, place the motif at the designated spot and rub it with a blunt object, such as the handle of a pair of tweezers. Finally, remove the protective foil. And to top it all off, tie several macramé cords around the large fir tree so that the Christmas baubles (applied by rubbing) really look like they're hanging.

* Without drying time
