Red soap house

Used items:

34 369 000	Soap casting mould: Christmas	1 piece
34 226 000	Creative-soap	70 g
51 752 06	Cord without wire, gold	60 cm
80 505 102	Letterhead A4, parchment, FSC Mix Credit, white	20 × 1.2 cm
73 113 521	Card A4, Kraft, FSC Recycled Credit Kraft	6 cm × 1 cm
46 108 000	Small wooden object Star, 2 cm ø	1 piece
57 991 637	A4 handicraft cardboard: Glitter renaissance gold	7 cm × 8 cm

Additionally you need:

Stove, pot, melting pot, scales, small plastic container,
craft stick as a stirrer, spoon

Instructions:

- 1 Melt the creative-soap in a water-bath on the stove (max. 60° - do not boil).
- 2 After the complete melting, you can stir the desired colour in the liquid soap. Therefore, use a wooden spatula or a teaspoon.
- 3 For the soaps with motif or logo, place upwards the label with the stamping in the cleaned casting mould.
- 4 To avoid blistering or slipping of the label, use at best a tablespoon with which you fill the casting mould with the liquid soap.
- 5 Let the soap dry well out (at least 2-3 hours, ideally one day).
- 6 Demould the soap by a slight pressure.

7 Place the cut-out parchment strip around the soap and stick them together on the rear side.

8 Wrap the golden cord three times around and knot it at the front side and glue the stamped tag and the small wooden object onto it.

Additional info

The soap dries or rather carries on ripening and becomes thereby firmer (two up to three weeks). Depending on the temperature and airiness, the soap can perspire. We recommend therefore to wrap the soap after its demoulding in a cellophane foil. Clean the soap casting mould and the pots with hot water.
