# Jewellery pendant tag with gold lettering

## Used items:

<b>36 023 000</b>	Casting mould: Tag Rectangle	
<b>36 054 000</b>	Casting mould: Tag Pendant	
<b>34 166 000</b>	Jewellery-cement	
<b>33 384 000</b>	Glue for foil	
<b>81 283 06</b>	Mirror-foil, gold	
<b>22 246 06</b>	Ring, 8 mm ø, gold	
<b>22 662 89</b>	Anchor chain, gilded 60 cm, gold-plated	
<b>89 541 000</b>	Flat round pliers for jewellery	13.5 cm

## Instructions:

- 1 To cast the jewellery-cement-pendant you need an elastic casting mould, a digital scale and a small plastic container as well a craft wooden stick for stirring. The mixing ratio:  
1 part of water : 5 parts of jewellery-cement.
- 2 First, weigh the water in a cup and then add gradually the jewellery-cement. Stir it with a craft wooden stick until a homogeneous mass arises.
- 3 Now, you can fill the mould with the casting compound. The mould should always be cleaned with detergent and water before being filled. If bubbles occur, you should tap few times the mould on the pad.
- 4 The temperature and the current air humidity determine the drying time. It is however advisable to demould the pendant only the next day. Allow post drying.
- 5 The upper side, in other words the subsequent reverse side, you can rectify with some fine sandpaper.
- 6 In order to decorate the front side, place the template My Style Vintage Poesie onto the lower third of the pendant. Press it slightly with a finger.
- 7 Take some glue with the flat brush and spread it evenly over the template.
- 8 Lay the mirror-foil, with the mirror-side upwards, onto the glue and rub it down with a finger.
- 9 Open the ringlet with two flat pliers and hang the anchor chain in. Close the ringlet by using the both pliers.
