

HANDICRAFT TIP

GB

Washing your hands will
become a real pleasure!
Scented duck soap.

WWW.RAYHER.COM

Used items:

34 302 000	Latex full-form mould: Duck	1 piece
34 228 000	Creative-soap	90 g
34 246 160	Soap colour, lemon	2-8 drops
34 254 000	Soap scented oil - lime	1 drop

Additionally you need:

34 478 505 Holder for latex moulds

64 583 505 Craft wooden sticks (for stirring)

Wax melter, container suited to latex casting mould, poss. cling foil

Instructions:

1 Melt the creative-soap in a bain-marie on the stove (max. 60°C – do not boil).

2 Once the soap has melted completely, add two to eight drops of soap colour and a drop of scented oil, and stir well.

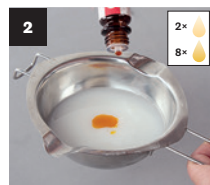

3 Hang the latex casting mould with its holder in a suitable container (a glass or a plastic cup). Then, fill the mould to the brim with liquid soap. Let the soap dry thoroughly (at least 2-3 hours, at best one day).

4 To demould the soap, carefully roll the latex mould outwards.

5 Depending on the temperature and humidity, the soap may continue to „sweat“. To avoid this, we recommend wrapping the soap in cling foil after demoulding.

TIP Leave the soap to dry for 2 to 3 weeks in order to „mature“ and to increase bar hardness.

6 Clean the soap casting mould and the wax melter with hot water.
