

**CRAFTING IDEA**

# Duck-shaped soap

## Used items:

<b>34 302 000</b>	Latex full-form casting mould: duck	1 piece
<b>34 228 000</b>	Creative-soap	90 g
<b>34 246 160</b>	Soap colour, lemon	2-3 drops
<b>34 254 000</b>	Soap fragrance oil, lime	1 drop
<b>61 217 31</b>	Craft sticks	4 pieces

## Additionally you need:

Stove, melt, melting pot, scale, small plastic container, wooden sticks as a stirrer or teaspoon, tablespoon

## Instructions:

- 1 Melt the creative-soap in a water-bath on the stove (max. 60° - do not boil).
  - 2 After a complete melting, stir 2-3 drops of the soap colour lemon and a drop of the fragrance oil lime into the liquid soap. Therefore, use a wooden stick or a teaspoon.
  - 3 Fix the latex casting mould at best with 4 craft sticks at the upper rim of a vessel e.g. plastic container.
  - 4 Now you can pour the mould completely out with the liquid soap.
  - 5 Let the soap dry well out (at least 2-3 hours, ideally one day).
  - 6 To demould the soap, push the latex mould at best outward.
- Tip** Let the finished soap dry at best for 2-3 weeks; the longer it ripens, the firmer becomes.
- 7 Depending on the temperature and airiness, the soap can perspire. We therefore recommend to wrap the soap after its demoulding in a transparent foil for flowers (cellophane).
  - 8 Clean the soap casting mould and the pots with hot water.
