<b>89 230 00</b>	Slotted picture hanger, paper, 40 mm ø	1 piece
<b>33 487 000</b>	Adhesive pen, 30 g	10 g

## Additionally you need:

Ruler, pencil, pair of compasses, underlay for spraying

## Instruction:

Use the wooden board of 14.8 cm ø and the wooden ring of 15 cm ø (inside) and 16.9 cm ø (outside) from the wooden board/ring set.

**1** Draw a horizontal and a vertical line with a pencil and a ruler in the middle of the wooden board. Use the compass to draw 3 circles from the centre in the following diameters: 6 cm ø, 9 cm ø, 12 cm ø

**2** Always apply the adhesive pen to the wooden sticks, not to the wooden board. Glue the wooden sticks subsequently to the wooden board as shown on the picture.

**3** Start with gluing the wooden sticks at the largest circle, then at the smallest one and finally at the middle circle. Allow them to dry well out.

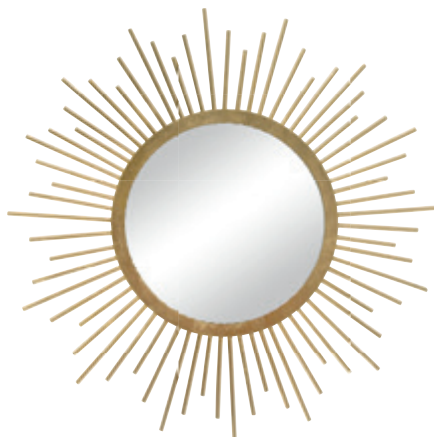

**4** Prepare the spray can according to the product information, then spray the wooden board with the craft wooden sticks. Spray the wooden ring at the same time. Spray it all 3 times and let the sun mirror always dry for 1 hour between each application.

**IMPORTANT:** Allow the paint application to dry for 3 days in order to prevent any damage on the back of the mirror when gluing the mirror plate.

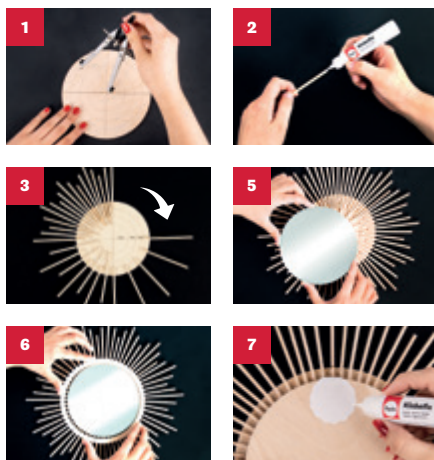

**5** Apply the adhesive pen to the wooden sticks up to the edge of the wooden board, let the glue dry out for a short time, approx. 5 minutes. Then place the mirror plate on it. Press evenly and slightly on.

**6** Apply a thin line to the wooden ring by means of the adhesive pen and put it carefully around the mirror plate. Let it dry out thoroughly, approx. 1 hour.

**7** Glue the picture hanger to the back of the wooden board by means of the adhesive pen. Let it dry out thoroughly, approx. 1 hour.

\* Without drying time
