Stone „Heilige Kommunion“

Used items:

36 102 000	Silicone casting mould Stone	1 piece
36 990 00	Casting powder „Raysin“ 200	approx. 150 g
45 134 000	Screen printing stencil	1 piece
38 867 390	Chalky Finish, lagoon	1/50 can
38 867 102	Chalky Finish, white	1/100 can

Additionally you need:

37 080 000	Paintbrush set Hobby Kreativ	1 set
89 530 00	Sandpaper	
61 216 31	Craft wooden stick	1 piece

Scales, mixing cup, scissors

Instructions:

1 Mix 150 g of creative-cement according to instructions, mix it evenly and pour out the big, oval stone in a casting mould. After about 1 hour, you can turn the mould upside down and remove the stone from the casting mould (demould). Allow the stone to dry thoroughly out for several days. Smooth the resulting stone edges with sandpaper.

2 Paint the stone with the All Purpose lagoon paint. Let it dry out.

3 Cut out the motif "Heilige Kommunion" from the screen printing stencil and peel off the backing paper from the stencil. Place the motif in the middle of the stone. Stretch the stencil slightly over the surface of the stone and rub it firmly with your fingers. The applied motif should not form any creases, should lie fully on the surface and should be snug-fitting to the surface shape of the stone.

4 Now spread, quickly and evenly, the white Chalky Finish paint over the motif and the letters on the stencil by means of the paintbrush. After stencilling, carefully remove the stencil sideways and clean it immediately with water. Let the stone dry well out.

TIP: In order to protect it, you can coat the stone with Chalky Finish Soft-Touch Clear varnish.
