Used items:

67 366 102	Cellulose pulp sheet, white	1 piece
55 943 000	Bee Rescue seed mix	1 piece
42 000 104	Jute cord wound on wooden card, 1.5 mm ø, ivory	130 cm
67 276 102	Block bottom paper bag, white	1 piece

Additionally you need:

34 425 000	Cookie cutters, heart-shaped, for decoration
38 434 00	Sponge stamp
89 284 00	Punch pliers, 4 mm ø
89 378 00	Craft scissors
suitable vessel for the preparation of the pulp	
clay pot	
potting soil	

Instructions:

Basic instructions for papermaking

1 Fibre pulp mixing: Tear paper (pulp sheets) into pieces, pour hot water over them and leave to soak for about 30 minutes. Beat the paper pulp with a blender or hand blender (add hot water if necessary if the pulp is too firm).

2 You can also stir in paint, e.g. All-purpose paint, soap dye or natural colour pigments such as turmeric powder.

3 Dipping: Put the heart-shaped cookie cutter on a cloth, e.g. a kitchen towel, and scoop about three spoonfuls of the pulp into the heart by means of a tablespoon.

4 Sprinkle the seed mixture into the fibre pulp.

5 Using the sponge stamp from above, carefully press the fibre pulp into the heart-shaped cookie cutter and at the same time absorb the excess liquid.

6 Lifting: Carefully lift the heart-shaped cookie cutter off the scooped heart.

7 Drying: Carefully peel off the scooped, still slightly wet heart of the couching material and hang it on a clothesline for the final drying.

8 Decorating: You can decorate e.g. a clay pot with the dry heart by punching a hole in the heart by means of the punch pliers and attaching it to the clay pot with the jute cord.

TIP: If you insert the heart in the potting soil and water it, you will soon have your own little bee meadow.
