Pot with star-motif out of kneading-cement

Used items:

34 211 000	Creative kneading-cement	100 g
29 097 000	Stamp „Star“	1 piece

Additionally you need:

Container for kneading of the kneading-cement (e.g. bowl with lid)
 Disposable gloves
 Stable support e.g. the lid of a plastic bucket
 PET spray bottle (item 38 798 000)
 Brush
 Small container with water
 Poss. sandpaper (item 89 530 00)
 Plastic flowerpot ø 6 cm

Instructions:

- 1 The flowerpot must always be clean and free of grease. Always wear the plastic gloves while working out!
 - 2 Mix the kneading-cement with water in the ratio 9:1 (9 parts of cement : 1 part of water). This corresponds to about 11 ml. Stir the water slowly, gradually add it while constantly kneading. Knead the crumbly mixture with damp disposable gloves (if necessary, moisten several times) until the desired consistency is achieved.
 - 3 Put the kneading-cement onto the flowerpot by hands until it is coated all around. Spread upwards the cement evenly with a slightly moistened brush.
 - 4 You can get great effects by stamping centrally a sophisticated star-motif on the flowerpot by using the stamp.
 - 5 Let it dry at least for 1 day. The entire drying period lasts for several days. After about 21 days the object is weatherproof.
- Hint** You can mix also, quickly and easily, the kneading-cement in a sealable container. Here also add the water gradually by stirring it constantly, then close the container and shake it well. That way there is less dust and the parts intermix perfectly. Knead more afterwards the crumbly mixture with wet disposable gloves (if necessary, moisten several times) until the mixture is malleable.
