Additionally, you will need:

89 289 000	Aluminium ruler
-------------------	-----------------

Instructions:

Paint the front & the rear side of the big wooden ring as well as of 6 big untreated wooden feathers and 4 small untreated wooden feathers with the cashmere gold metallic paint by means of the sponge stamp. Paint also the front & the rear side of the 2 big and 1 small untreated wooden feather with the white All Purpose paint.

1 Cut the jute cord as follows:

1 × 36 cm, 2 × 32 cm, 2 × 28 cm, 2 × 25 cm,
2 × 22 cm, 2 × 19 cm.

2 Then, paint the front & rear side of the laser-cut wood disc with the white All Purpose paint, but leave the edge and the motif in the middle unpainted.

3 Thread 2 white, 3 natural-coloured and 6 golden wooden feathers on each jute cord and knot them firmly. Then, thread in turn 1 white and 1 natural-coloured wooden bead on.

4 Attach the cords to the big ring according to the picture, so that they hang forming a V-shape.

5 Affix 2 small golden feathers onto each laser-cut wood disc at its front & rear side and stick laterally onto the right feather a white feather by means of the adhesive dots.

6 Take the remaining jute cord of 70 cm, attach the laser-cut wood disc to the big wooden ring and make an overhand knot *. Thread, on both jute cords, 1 white and 1 natural-coloured bead and finally, tie a knot at one end.
