CRAFTING TIP

Honeycomb balls, red

GB

WWW.RAYHER.COM

Used items:

*per honeycomb ball

67 252 291	Paper mini bag XXS, burgundy	16 pieces
51 752 06	Cord, without wire, gold	80 cm
55 393 616	Tassel, gold	1 piece
62 504 00	Raw wood balls, drilled, 12 mm ø	2 pieces
35 014 616	Extreme Sheen, gold	1/50 bottle
22 184 21	Rhinestone rondelle, 10 mm ø	1 piece
89 568 00	Magnet, 6 mm ø	2 pieces
33 396 00	Paper glue	1/20 bottle
30 068 000	Special adhesive double-sided tape	10 cm
89 597 00	Motif-puncher: round, 1.6 cm ø	1 piece
53 888 000	Fixing clamps, assorted	2 pieces

Additionally you need:

89 379 00	Pointed tip paper scissors	
37 053 000	Paintbrush set Hobby Kreativ	(Paintbrush size 8)
62 039 00	Wooden skewer, 10 cm	2 pieces
	Solid cardboard	
	Pencil	

Instructions

For the honeycomb ball A, B or C, you need 16 paper mini-bags XXS.

Transfer the template of the desired honeycomb ball A, B or C onto solid cardboard and cut it out according to the pattern.

1 Put 2-3 paper mini-bags XXS on top of each other and fix the template with one or two fixing clamps at the bottom and lateral edge of the bag stack. The opening of the bag points downwards and is visible. The template must always be put identically down! Circle the template with a pencil.

2 Remove the template and cut only at the marking ———. The bottom edge remains closed - do not cut open! Repeat this until the specified number of bags is reached (16 x). The adhesive pattern of the honeycomb balls A and B helps you stick the positions ●1 and ●2 together.

3 For the honeycomb balls A and B, put the bags on the adhesive pattern and first stick each opened bag together at the point 1 on the inside with a small drop of (some) paper glue. Press on briefly. Stick all 16 paper mini-bags XXS together this way.

4 To create a honeycomb pattern, glue the prepared 16 paper mini-bags XXS flush and properly on top of each other (using again the adhesive pattern). At the point 2, glue it precisely with a little paper glue. Apply a thin coat of paper glue to the lateral edges of the marking (— — —) and stick the paper mini-bags XXS together to form a stack. Briefly press on each bag.

5 Once you have stuck all the bags together flush, stick a strip of the special double-sided adhesive tape to the stack of bags (inside the honeycomb ball).

From the rest of the red paper mini-bag XXS, punch out 2 small circles. Use the paper glue to fix a magnet with the punched-out red circle (see marking x) on the inside of the first paper mini-bag XXS. Unfold carefully the honeycomb ball and hold the counter-magnet toward the inside of the last paper mini-bag XXS. The counter-magnet is being drawn toward the first one. Then affix firmly the other red circle to the magnet with the paper glue.

6 Paint the raw wood balls on a wooden skewer with a paintbrush and the golden paint Extreme Sheen. Allow them to dry out well. To hang the honeycomb ball up, thread on a cord a tassel, a painted raw wood ball and the rhinestone rondelle, put the cord into the still open honeycomb ball and thread the second painted raw wood ball onto it as well. The initial bottom edge is the upper side of the honeycomb ball. Remove the foil from the special double-sided adhesive tape on the bag stack and attach the threaded cord to the honeycomb ball. At the end, unfold the honeycomb ball evenly.

Honeycomb ball C:

Apply the same instructions as for the honeycomb balls A and B, just glue all 16 paper mini-bags XXS flush and properly on top of each other at the lateral edges (— — —) and that's how you get a honeycomb-like ball/sphere.
