## Used items:

<b>36 173 000</b>	Silicone casting mould Fish	1 piece
<b>36 990 00</b>	Casting powder "Raysin" 200	approx.90 g
<b>34 463 558</b>	Creative-cement 5in1	approx.100 g
<b>31 042 02</b>	Wax pellets, white	approx.50 g/fish
<b>31 017 00</b>	Wick for tealight candle, 50 mm	1 wick/fish
<b>35 050 000</b>	Chalky ultra-matt varnish	1/100 can
<b>35 077 100</b>	Allround Paint acrylic, snow-white	1/200 bottle
<b>35 077 564</b>	Allround Paint acrylic, mouse-grey	1/200 bottle
<b>31 070 00</b>	Adhesive wax squares	1 piece

### Additionally you need:

Mixing vessel, wax melter, masking tape or adhesive tape, paintbrush, scissors

## Instructions:

- 1 Cast the fish with Raysin and creative-cement 5in1 according to package instructions. Leave the castings to dry overnight.
- 2 Paint a line about 5 mm wide along the bottom edge of each fish with acrylic paint (one in white, the other in grey). Apply a coat of Chalky ultra-matt varnish to the inner side of the fish to prevent permeation of the wax when burning. Leave to dry once more.
- 3 To fill the fish with wax, first melt the wax pellets in a wax melter. Secure the tealight candle wick in the middle of the fish by means of an adhesive wax square. Once the wax has turned to liquid, pour it carefully into both fish. However, make sure the wick stays straight (if necessary, hold it back). The wax should then be left to cool to room temperature. If a dimple forms in the wax as it cools down, simply pour a little liquid wax into it.

\*Without drying time
