Wall-decoration wooden  
crate with pineapple

[WWW.RAYHER.COM](http://WWW.RAYHER.COM)

## Used items:

<b>62 727 000</b>	Wooden crate lath-optic, FSC Mix Credit	1 piece
<b>55 730 000</b>	Jute cord, 6 mm ø	1 m
<b>42 000 444</b>	Jute cord on wooden card, 1.5 mm ø, pine-green	2 m
<b>62 734 000</b>	Wooden pineapple FSC 100% to set up	2 pieces
<b>62 733 000</b>	Wooden pineapple FSC 100% to set up	1 piece
<b>38 870 552</b>	Chalky Finish cream-wax, dark brown	6 ml
<b>38 867 572</b>	Chalky Finish, anthracite	4 ml
<b>39 460 37</b>	Plastic ball, 2-part, 12 cm, crystal	1 piece
<b>38 000 428</b>	All Purpose paint, leaf-green	3 ml
<b>38 000 162</b>	All Purpose paint, golden yellow	2 ml
<b>53 587 616</b>	Metallic yarn "Stitch & Knot", gold	50 cm
<b>39 342 508</b>	Granulate, beige	50 g
<b>55 728 000</b>	Fern	1 piece

## Additionally you need:

<b>33 363 00</b>	Mini hot glue gun	
<b>38 241 00</b>	Paint sponge	1 piece
<b>37 319 000</b>	Set of brushes "Chalky Basic"	1 piece

## Instructions:

**1** To trim these natural wooden crates into an „ancient“ look, dip the slightly damp paint sponge into the Chalky Finish brown cream-wax and wipe it over the whole surface.

**2** Take some Chalky Finish anthracite paint with another paint sponge and wipe it in places onto the still wet wax.

**3** By means of the first sponge, the transitions from brown to anthracite are going to become blurred.

**4** Paint the wooden pineapple with the All Purpose paint in golden yellow and leaf-green.

Thread the jute cord 6m long at the corners of the wooden crate and fix the crate by a pine-green jute cord with a winding knot

**5** With the golden metallic yarn „Stitch & Knot“, you can achieve nice effects by rolling it along the line and by gluing it firmly on the back. Stick the small pineapple with the hot glue gun at a half of the plastic ball. Take care that the suspension looks down.

**6** Disperse the granulate in this half, and stick together the ball with a bit of hot glue.

**7** At the end, decorate the pineapple and the fern and affix them too with the hot glue.

**8** Pin down firmly the ball at the frame section and possibly affix it with some hot glue on the back.
