Instructions:

1 Mix Raysin following the instructions on the package and pour in the house at a height of about 3 cm. Demould it carefully after ca.1 hour. Allow the house to dry thoroughly for several days. If necessary, you can sand its edges using sandpaper. Glue the matching taupe-coloured cardboard cuttings behind the wooden door and window. Paint the roof, wooden door, window and letterbox to your liking and glue them onto the Raysin house. Stamp the letter on the cardboard, cut it out and stick it on the letterbox.

2 Paint and decorate the wooden fir trees, add the rest of the gnome accessories as decorations and the decorative snow, if desired.

3 Stamp the pine slices with the footprints and spread them out along the path leading to the door.

4 Don't forget to find a place for the wooden bench in the world of gnomes.
